

CRIZAL® RX AND STOCK LENS AVAILABILITY CHART

Crizal®

Crizal® No-Glare Lenses Have Been Awarded

The Skin Cancer Foundation
Seal of Recommendation for
Safe and Effective Sun Protection

UV PROTECTION

Lenses that protect are the only lenses you should recommend to your patients.

Crizal No-Glare lenses:

- Offer comprehensive UV protection from the front and back side*
- Resist smudges, scratches, and glare for unmatched value and protection
- **Are available on a large variety of lens blanks and designs, making it one of the most compatible and flexible products for your patients**

*Crizal No-Glare lenses offer comprehensive UV protection on all lens materials except 1.50 clear plastic

† *Crizal Kids UV* lenses are bundled products. They come as a single vision polycarbonate lens, coated with the respective Crizal[®] No-Glare lens treatment.

THE 3 PILLARS OF CRIZAL®

Clarity.....

Embedded anti-reflective layers reduce glare and allow 99% of light to pass through. A patent-pending nanolayer with Multi-Angular Technology™ further enhances clarity by reducing reflections at every angle.

Durability.....

An embedded hard coat, combined with the SR Booster™ layer, provides excellent scratch resistance. An HSD™ Super Hydrophobic layer resists smudges and makes lenses easier to clean.

Protection.....

A backside protection layer helps prevent UV rays from bouncing off the back of the lens and into the eyes while the front of the lens provides up to 100% protection* from these harmful rays. With Crizal® Previncia®, an additional layer on the front side filters up to 20% of Harmful Blue Light**.

* With the exception of clear plastic (1.50) substrates.

** Harmful Blue Light is the blue-violet wavelengths between 415-455nm on the light spectrum, believed most toxic to retinal cells.

Image represents the Crizal Sapphire® 360° UV No-Glare lens treatment stack. Thickness and order of layers is for demonstration purposes only.

† Harmful Blue Light is the blue-violet wavelengths between 415-455nm on the light spectrum believed most toxic to retinal cells.

* E-SPF® is an index rating of the overall UV protection of a lens. E-SPF® was developed by Essilor International and endorsed by third-party experts.

The E-SPF® index relates to lens performance only and excludes direct eye exposure that depends on external factors (wearer's morphology, frame shape, position of wear).

* In a clear lens.

CRIZAL[®] NO-GLARE LENSES

Worn and trusted by millions of people worldwide.
