

Be confident in the quality of Crizal® No-Glare Lenses

Crizal No-Glare lenses have earned The Skin Cancer Foundation's Seal of Recommendation for their safe and effective protection against UV radiation. The Seal of Recommendation, a symbol recognized and trusted worldwide, is overseen by renowned dermatologists and granted to products that meet the Foundation's stringent criteria for safe and effective sun protection.

(3) Lenses are guaranteed for up to two years from original order date from product failure resulting in atypical scratching or crazing from normal use.

KEY BENEFITS:

REDUCES
GLARE

RESISTS
SCRATCHES

RESISTS
SMUDGES

UV
PROTECTION

CRIZAL® LENSES ARE BEST FOR:

- Everyday wear
- Nighttime driving
- Computer screens and digital device usage
- Everyday UV protection
- Maintaining the durability of your lenses

NEW Crizal® Sapphire™ HR

The best anti-reflective coating overall.⁽⁴⁾ Crizal® Sapphire™ HR is answering all of eyeglass wearers' main concerns by shielding the eyes and the lenses against reflections, scratching, smudging and UV light for long-lasting transparency and protection.

Crizal® Previncia®

Between sunlight, indoor lighting and most digital screens, Harmful Blue Light⁽⁵⁾ surrounds you every day. Help stay protected with lenses that filter Harmful Blue Light while still allowing the beneficial part of blue light to pass through.

Crizal® Rock™

Whether it's accidental drops, wiping your lenses with a t-shirt or tissue or losing your protective cases, life is always tough on lenses. Make sure your lenses are life-proof with Crizal® Rock™; lenses that make scratches and smudges a thing of the past, with durability like never before!⁽⁶⁾

Ask your Eyecare Professional which Crizal product is right for you.

(4) Within the US market, based on the results in several studies in areas of anti-reflective efficiency (Internal Essilor R&D measurement - 2020), ease of cleaning, smudge and scratch resistance (Internal Essilor R&D 2020 and External testing 2020 at NSL Analytical Services, Inc. funded by Essilor), and UV protection (Internal Essilor R&D 2020).

(5) Harmful Blue Light is the blue-violet wavelengths found between 415–455nm on the light spectrum believed most toxic to retinal cells. Harmful Blue Light protection only available with Crizal® Previncia®. Crizal Previncia No-Glare lenses filter at least 20% of Harmful Blue Light.

(6) External laboratories' tests and internal technical tests – vs all previous generations of Crizal coatings.
