Comprehensive UV protection

The higher the E-SPF Index, the greater the level of UV protection provided by the lens

Optimal UV protection in a clear lens

The higher the E-SPF Index, the greater the level of UV protection provided by the lens

E-SPF® is an index rating the overall UV protection of a lens. E-SPF® was developed by Essilor International and endorsed by third party experts. The E-SPF® index relates to lens performance only and excludes direct eye exposure that depends on external factors (wearer's morphology, frame shape, position of wear).

*Harmful Blue Light is the blue-violet wavelengths between 415-455nm on the light spectrum believed most toxic to retinal cells.
