Fitting Eyezen® Lenses

Eyezen lenses require the following standard measurements:

- . Monocular Distance PD
- . Fitting Height: Simply measure from center pupil to the lowest point of the lens to acquire fitting height. Eyezen®+ 1, 2, 3 and 4 lenses have a minumum fitting height of 15mm. There is no minimum fitting height for Eyezen® Start™ and Eyezen® Kids lenses.

Eyezen lenses come with embedded blue-violet light filtration¹ and should also be paired with a Crizal[®] No-Glare coating for additional clarity, durability and protection.
