

HERITAGE xtreme

Designed to excel in all visual departments, this is the ultra-premium everyday lens.

Benefits

Minimal swim effects and provides excellent patient comfort and rapid adaptation. The hard design has wider fields of view.

Performance

Built In Technology

Corridor Minimum Fitting Height Fixed or Variable Minimum Fitting Height 14 mm

HERITAGE ultimate

Recommended for presbyopes choosing their first progressive design.

Benefits

Consistent optical performance with an automatic corridor selection ensuring the best lens chosen for individual requirements. The hard design has wider fields of view.

Performance

Built In Technology

Corridor Minimum Fitting Height Fixed or Variable Minimum Fitting Height 14 mm

HERITAGE plus

Excellent all purpose progressive design with fast adaptation and strong performance in all visual fields.

Benefits

A particularly wide field of view for a basic progressive design.

Performance

Built In Technology

Corridor Minimum Fitting Height Fixed or Variable Minimum Fitting Height 14 mm

HERITAGE

Value entry level all purpose progressive design which provides strong performance in all visual fields.

Benefits

An extremely comfortable design, with lower overall astigmatism.

Performance

Built In Technology

Corridor Minimum Fitting Height Fixed 14 mm

HERITAGE driver

Designed to give maximum performance for frequent drivers.

Benefits

Has a wider distance for comfortable viewing across the windshield to side mirrors.

Performance

Built In Technology

Corridor Minimum Fitting Height Fixed 21 mm

HERITAGE sport

Excellent progressive design for active and dynamic environments.

Benefits

Suitable for wrap style frames, this design provides strong distance and more than adequate near vision.

Performance

Built In Technology

Corridor Minimum Fitting Height Fixed 18 mm

HERITAGE office

A great lens to wear while working at tasks requiring near and intermediate vision.

Benefits

The benefits over a fully corrected progressive lens are a wider field of view and more comfortable posture as the reading area is much more accessible.

Performance

Built In Technology

FULL BACK SIDE

Corridor Minimum Fitting Height Fixed 14 mm

HERITAGE desk

Designed for those who work at very close tasks all day such as heavy computer users, carpenters, and artists.

Benefits

Offers extremely wide fields of view and positions the required reading power to reduce potential neck discomfort.

Performance

Built In Technology

FULL BACK SIDE

Corridor Minimum Fitting Height Fixed 14 mm

HERITAGE single vision

Designed to bring digital technology to single vision lenses.

Benefits

Uses Digital EyeView to reduce peripheral distortion caused by unwanted astigmatism associated with conventional single vision lenses.
