

## BENEFITS OF ANTI-REFLECTIVE COATING:

Allows more light to reach your eyes, improving visual acuity.

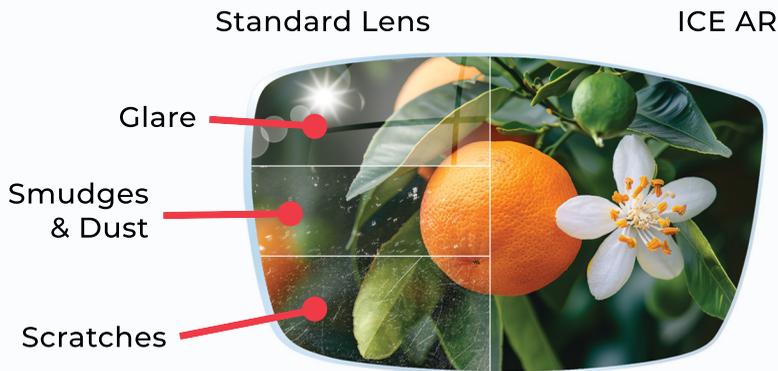

Decreased nighttime reflections, especially when driving.

Reduced eye strain and fatigue often related to glare from artificial lighting, tablets, and computer screens.

On sunglasses, it prevents sunlight from reflecting into your eyes when the sun is behind you.

An advanced AR coating that leverages Essilor's patented technology to provide your patients with a superior hydrophobic, scratch-resistant top coat.

Designed for ease of cleaning and built for durability, this coating is ideal for discerning patients who demand a premium product without compromising on value.

ICE AR surpasses many competitors in scratch resistance, smudge prevention, and cleanability, all backed by a 2-year warranty.
