Kodak

Clean&CleAR Lens

KODAK Clean&CleAR™ Lens enhances the performance of your prescription by reducing glare for clearer vision, while improving the cosmetic appeal of your eyewear.

With KODAK Clean&CleAR Lens, you'll not only see better, you'll feel better about the way you look, too.

The difference is strikingly clear.

Regular Lens

KODAK Clean&CleAR Lens

With an untreated lens, approximately 10% of light is reflected away from the eyes, which makes it difficult to see clearly.

With KODAK Clean&CleAR Lens coating, glare is reduced, enabling approximately 99% of available light to reach the eyes, for clear, crisp vision.

Added protection, performance and value—from a brand you can trust.

Regular Lens KODAK Clean&CleAR Lens

Reduces eye strain and fatigue caused by glare from artificial lighting, tablets and computer screens.

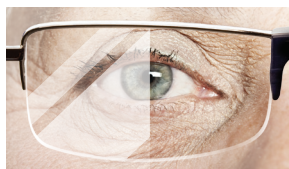

Significantly reduces nighttime reflections, and improves the wearer's ability to see objects in low light.

Advanced technology makes lenses easier to care for: Oily smudges and grime wipe away with ease.

Protects lenses from irritating scratches so they will last longer and look better.

Eliminates unsightly glare on lenses for a natural look; almost like no lenses at all!

Water-repellent performance: A super-slick top coat seals the lens and repels water.
