

**Easy to Dispense,  
Easy to Adapt to.**

All the features and benefits of the award-winning Kodak Precise® Lens in a full-backside design.

The viewing areas work together to provide the wearer:

- A more natural wearing experience with viewing zones perfectly placed to promote natural head and eye movement at distance and near
- Comfortable, clear vision where they need it most
- Smooth transition from one zone to the next reducing the blurring or “swim effect” for easy adaptation

**Kodak**  
Precise PB Progressive Lens

**Kodak** Precise PB Lens is created using Vision First Design™, proprietary technology that controls the surface power at virtually every point on the lens. The result is a smooth power increase across the entire lens, top to bottom.

Vision First Design Technology provides:

1. A broad field of view in a clear distance area.
2. Smooth gradation of power across the surface of the lens to ease patient adaptation.
3. Gentle binocular balance for quick, clear object recognition.
4. Visual quality often compared to a single vision lens.
