THINK ABOUT YOUR LENSES

VARILUX®

SHARP VISION AT ANY DISTANCE

VARILUX® X series™

Simulated images

OUR MOST ADVANCED PROGRESSIVE LENS

Varilux® X Series™ lenses with Xtend™ Technology provide sharp vision and smooth transitions at any distance, while extending your vision within arm's reach. You no longer have to tilt or angle your head to find perfect focus like you do with ordinary progressive lenses.

DO YOU NEED PROGRESSIVE LENSES?

Or are your current progressive lenses not working? Ask yourself. Do you:

- Experience blurred vision when reading?
- Hold reading material at arm's length?
- Have trouble reading in dim light? For example, is it difficult to read a menu in a dimly lit restaurant?
- Have presbyopia?

WHAT IS PRESBYOPIA?

Presbyopia is a condition in which the lens of the eye gradually loses flexibility, making it difficult to focus on close objects. It happens to nearly everyone, usually starting around age 40.

#1 PROGRESSIVE LENS BRAND

Varilux lenses are designed with Essilor's proprietary Wavefront Advanced Vision Enhancement™ (W.A.V.E.) technology, which eliminates the distortions found in other progressive lenses. This lets Varilux lenses offer sharp vision and smooth transitions at any distance, even in dim light. Take it all in without the annoying line of a bifocal lens, and enjoy natural vision. Forever.

Ask your Eyecare Professional which Varilux® lens is right for you.

KEY BENEFITS:

PROVIDES SHARPER VISION

SMOOTH TRANSITIONS NEAR TO FAR

ELIMINATES OFF-BALANCE FEELING

EXTENDS VISION FOR REDUCED HEAD MOVEMENT
